## FIRST QUARTER 2013 DATA FROM THE QUARTERLY FINANCIAL REPORT: LARGE U.S. RETAIL TRADE CORPORATIONS

### After-Tax Profits and Sales, First Quarter 2013 – Not Seasonally Adjusted

First quarter 2013 **after-tax profits** of U.S. retail corporations with assets of \$50 million and over totaled \$16.3 billion, up \$0.5 ( $\pm 0.1$ ) billion from the \$15.8 billion recorded in the first quarter of 2012, but down \$7.2 ( $\pm 0.0$ ) billion from the \$23.4 billion recorded in the fourth quarter of 2012.

**Sales** in the first quarter of 2013 were \$603.9 billion, up \$14.4 ( $\pm 4.2$ ) billion from the \$589.5 billion recorded in the first quarter of 2012, but down \$39.0 ( $\pm 1.6$ ) billion from the \$642.8 billion recorded in the fourth quarter of 2012.

## Retail Trade Corporations' Sales, First Quarter 2013 – Seasonally Adjusted

Seasonally adjusted **sales** of U.S. retail corporations with assets of \$50 million and over totaled \$615.7 billion, up \$2.1 ( $\pm 1.6$ ) billion from the \$613.6 billion recorded in the fourth quarter of 2012, and up \$14.7 ( $\pm 4.2$ ) billion from the \$601.0 billion recorded in the first quarter of 2012.

### ACCESS TO QFR DATA

This press release can be viewed today in portable document format (.pdf) at the QFR internet website <http://www.census.gov/econ/qfr/index.html>. Summary statements of income and retained earnings, balance sheets, and related financial and operating ratios for retail trade corporations, as well as information on adjustments for seasonal variation, are available at the QFR internet website. Time series/trend chart data are available at <http://www.census.gov/econ/qfr/index.html>, select the Time Series/Trend Charts link under Latest QFR Press Releases.

### RELIABILITY OF THE ESTIMATES

Estimates of change presented in this press release are calculated using unrounded data. The calculated difference is then rounded to the nearest unit of measure. Due to this rounding, differences may not add to the totals. The same applies to the calculated confidence intervals. Thus, a difference of \$0.0 billion indicates the difference is less than \$0.05 billion. A confidence interval of  $\pm 0.0$  billion indicates a confidence interval with width of less than  $\pm 0.05$  billion on each side of the estimated value.

Data in this press release are based on quarterly financial reports from approximately 600 U.S. corporations. The data are estimated from a sample survey and are subject to sampling and nonsampling errors.

Sampling error occurs because only a subset of the entire population is measured. Estimates of sampling error can be computed based on the sample and used to construct confidence intervals around the estimates. Statements of change appearing in this report include 90 percent confidence intervals. Thus, a statement in the report such as “up \$2.5 ( $\pm 0.2$ ) billion” estimates the interval (+\$2.3 billion to +\$2.7 billion) within which the actual value is likely to fall in 90 percent of samples of the same size and design, drawn from the same population. If the range of estimated change contains zero (0), then it is uncertain whether there is an increase or decrease; that is, the change is not statistically different from zero (0). For any comparison cited in the text without a confidence interval, the change is statistically significant at the 90 percent confidence level.

Nonsampling error encompasses all other factors that contribute to the total error of a survey, including response errors, nonresponse, and coverage errors. Although no direct measures of nonsampling error are available, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize their influence. The quarterly publication, *Quarterly Financial Report for Manufacturing, Mining, Trade and Selected Service Industries – First Quarter 2013* (QFR/13-Q1), includes more detailed explanations of nonsampling and sampling error, and additional measures of sampling variability.

#### **DATA QUALITY INDICATORS**

The QFR produces two indicators of data quality: the Unit Response Rate (URR) and the Total Quantity Response Rate (TQRR)<sup>1</sup>. The URR is defined as the percentage of sampled units (unweighted) that responded to the current quarter's survey. In determining the URR, a unit is classified as a respondent if it provided adequate information for key QFR data items. The TQRR is defined as the weighted estimated total of a key QFR data item that is either reported by a survey unit or acquired from some other information source (such as a publicly available quarterly or annual report) that is determined to be equivalent in quality to reported data. The TQRR is calculated for the QFR data items Net sales, Depreciation, Income before income taxes, and Total assets.

The Unit Response Rate (URR) and Total Quantity Response Rates (TQRR) for the current quarter are: URR for All retail trade: 69.5%; TQRR for Net sales: 87.1%; TQRR for Depreciation: 89.0%; TQRR for Income before income taxes: 92.2%; and TQRR for Total assets: 90.3%. For more information, see the Introduction, Survey Methodology section, in the *Quarterly Financial Report for Manufacturing, Mining, Trade, and Selected Service Industries*.

<sup>1</sup>Imputation Rate = 100% - TQRR.

<b>U.S. Retail Trade Corporations Schedule of Release Dates for Calendar Year 2013</b>	
Second Quarter 2013	September 16, 2013
Third Quarter 2013	December 16, 2013
